Pre-Engagement Physical Fitness Testing Standards

Physical testing is mandatory requirement of the Akwesasne Mohawk Police Service. In the policing profession, physical skills and abilities are important job prerequisites. An applicant is required to successfully complete a physical fitness test at the pre-engagement stage.

This fitness appraisal will be completed by the police service's fitness coordinator who is a Certified Fitness Consultant. This consultant identifies time and location of the Fitness Test.

The medical consent form should be read, understood and signed prior to the administration of the fitness appraisal. It describes the nature of the appraisal items that will be under taken. It is NOT a waiver form. If you are between the ages 15 and 69 you should be checking with your doctor before you start.

The fitness appraisal tests flexibility, muscular endurance and aerobic conditioning. The test will consist of push-ups, trunk forward flexion, shuttle run, and core endurance. The standards differ between males and females and among different age groups which are listed below.

A passing mark of 60% is required for both genders.

Please observe the following example:

| Passing | Age | Push-ups | Forward Flex | Core Endurance | Shuttle Run | Gender |
|---------|-------|----------|--------------|----------------|-------------|--------|
| 60% | 20-29 | 24 | 31-31.5 | 1:50-1:59 | 7.5 | Male |
| | | 16-17 | 34-34.5 | 1:53-2:03 | 5.5 | Female |
| 60% | 30-39 | 19 | 31-31.5 | 1:36-1:41 | 7 | Male |
| | | 16-17 | 34-34.5 | 2:01-2:10 | 4.5 | Female |

Push ups: Hands directly under shoulders, body/head straight and rigid, full movement up and down.

Forward Flexion: A measuring instrument is used to indicate distance reached beyond toes with knees locked. Twenty-five centimeters is equivalent to touching your toes.

Shuttle Run: Running between two points (20m/60 ft. span). The run requires the person to quicken the pace after a certain time. IE; after 1 minute the pace will be little faster, after 2 minutes faster, etc. Level required depending on age.

Core endurance: The participant lies face down on top of the bench with lower body on the bench. The iliac crest is positioned on the edge of the bench. The client needs to be secured by either straps or a partner. Before starting the test the participant is told to recruit their core muscles throughout the test. Once participant is secured they raise up until they are parallel with their lower body. Their arms are placed across their chest with the hands on the opposing shoulders. The entire body forms one straight line with no rotation or lateral shifting. The client stays in this position as long as possible to a maximum of three minutes (180 seconds). They are allowed one warning to reposition themselves if they drop below parallel. Record the length of time that the test is performed.
